

# Cloud Cybersecurity Strategy and Services

*Delivering Agile & Secure Cloud Migration and Systems*

## The Need

Enterprise cloud deployment is mission critical, posing huge opportunities as well as creating massive vulnerabilities.

Given the amount of sensitive data across multiple cloud environments, the attack surface has expanded leading to greater threats including the introduction of malware and data loss.

## The Solution

HolistiCyber's Cloud Cybersecurity Services provide a solid strategy and process for cloud migration of applications while preserving and even enhancing the security posture of the system.

HolistiCyber's offering is tailored to the customer's needs, identifying attack surface and threats, in order to establish a viable, sustainable, and secure cloud security infrastructure.

## What to Expect

- Readiness assessment followed by threat modeling which will concentrate on your specific attack surface and threat agents.
- Full cloud security design based on your needs and cooperation with your team on securely implementing the actual migration.
- Cloud visibility for governance and compliance policies, as well as for ensuring continuity with processes, automation and testing.

## HolistiCyber – Defending what matters

HolistiCyber offers end to end, state of the art, nation state-grade cyber defense services & solutions, delivered by a team of world class, multidisciplinary cyber security experts.

World-class expertise

Holistic approach

Exclusive 'We think like a hacker' methodology

Leadership

Unique access to the darknet

Practical insights

Proprietary technological and automation tools
