

INCIDENT RESPONSE AND
MONITORING

Proactive Incident Response Team

*24/7/365 incident management, on site
or remotely*

The Need

When the unthinkable happens, you need to move quickly to minimize the damage and prevent further deterioration.

The Solution

Our HolistiCyber Incident Response Teams proactively and methodically prepare for worse-case scenarios, evaluating potential future threats and continually honing their ability to run sophisticated forensics and respond to incidents in real time.

What to Expect

- We create a customized response plan for your specific potential incidents.
- For each major aspect of this plan, we assemble a handpicked team of experts, processes, and technology recommendations to ensure success.
- We continuously review, update, and enhance the plan to meet evolving threats.

When an incident occurs

We employ our unique forensic analysis techniques and **evidence-acquisition** procedures to analyze both on-premises and cloud-based assets (**disk, memory, and network**)

HolistiCyber – Defending what matters
