Red Team Blue Team Simulations

Simulating Real-Life Attacks to Ensure Your Assets are Protected

The Need

Many organizations are quite confident in their existing cybersecurity measures, and believe their systems are hard to penetrate.

By simulating real-life cyberattack scenarios, red team blue team exercises reveal valuable data about the organization's true security capabilities and infrastructure.

These exercises are powerful and efficient in challenging and eliminating weak points and maintaining a robust security posture in response to constantly evolving threats.

The Solution

HolistiCyber's Red Team Blue Team Exercises deliver real-life simulations of multi-staged cyberattacks, uncovering vulnerabilities and potential abuses that can cause damage to the organization directly or indirectly.

HolistCyber's teams utilize new tactics, innovative techniques and proven methodology based on our nation state level of expertise.

What to Expect

- We will identify relevant threats
- We will then perform the tests
- We will provide a detailed report, including risk and damage assessment and mitigation recommendations

HolistiCyber – Defending what matters

HolistiCyber offers end to end, state of the art, nation state-grade cyber defense services & solutions, delivered by a team of world class, multidisciplinary cyber security experts.

World-class expertise	Holistic approach	Exclusive 'We think like a hacker' methodology	Leadership	Unique access to the darknet	Practical insights	Proprietary technological and automation tools
