STRATEGIC AND
CONSULTING SERVICES

Third Party Risk Management Services

Protecting organizations from Inherent Supply Chain Risks

The Need

Today's organizations manage relationships with numerous vendors, many times giving them unprecedented access to sensitive data across the supply chain. As such, vendors can potentially expose your organization to cyber-attacks, causing financial and reputational damage to your brand, not necessarily their own. A robust cybersecurity vendor management program enables organizations to anticipate and deal with inherent supply chain risk.

The Solution

Holisticyber's Vendor Management Services provide ongoing assessment and management of the organization's vendors, ensuring clarity and control over the supply chain.
The Program will enable the organization to cope with third party cyber-threats and improve overall security posture.

What to Expect

- We will take full ownership of the Vendor management process

- We will build your organization's vendor management policy

- We will define the process and procedures to be followed in order to assess, monitor and mitigate supply-chain related cyber-risks

- We will then assess the fitness of each existing and potential vendor in meeting the vendor management policy

- We will provide ongoing monitoring of each vendor's policy compliance status including tiering

HolistiCyber – Defending what matters

HolistiCyber offers end to end, state of the art, nation state-grade cyber defense services & solutions, delivered by a team of world class, multidisciplinary cyber security experts.

World-class expertise   Holistic approach   Exclusive 'We think like a hacker' methodology   Leadership   Unique access to the darknet   Practical insights   Proprietary technological and automation tools
